Description

Basic informationDescriptionOrder, delivery and payment

X-VIR (0.5 mg) is a drug based on the active ingredient entecavir. It is used to treat chronic hepatitis B in adult patients. This is a generic version of the original drug called "Baraklud". Iksvir is produced by the pharmaceutical company Natco Pharma (India).

### Buy X-VIR

You can always buy X-VIR (0.5 mg) in the required amount for a course of admission in our online pharmacy by filling out an application in the appropriate section of the website.

### X-VIR: price

The price of the X-VIR drug (0.5 mg) is much lower than that of the original, but the quality and effectiveness of its effect are in no way inferior to Baraklud. Since we work directly with manufacturers, we do not need to greatly inflate prices, so patients have the opportunity to receive full and affordable treatment.

### X-VIR: reviews

Russian doctors confirm the improvement in the dynamics in patients with viral hepatitis B. Regularly taking X-VIR (0.5 mg), patients are completely cured or they have a stable remission with an improvement in the quality of life. As for the patients themselves, they speak well of their well-being, which already two or three weeks after the start of regular treatment changes significantly for the better. The drug is non-toxic and generally very well tolerated.

### **The benefits of X-VIR (0.5 mg) are:**

- fights viruses;
- patients tolerate it well;
- it is available for use;
- minimal side effects.

### **Description of the drug X-VIR**

These are film-coated tablets. The film promotes optimal release of the active ingredient (Entecavir). Packing - in a container made of polymeric material (30 tablets per pack). The active substance content of entecavir in each tablet is 0.5 mg.

### **X-VIR: indications for use**

It is intended for adults with chronic forms of hepatitis B. Due to the intense action of entecavir, the virus does not spread throughout the body. The drug prevents the occurrence of complications in the disease. It can be used as a monotherapeutic agent, but more often it is prescribed as one of the components of complex treatment.

### **Contraindications Entecavir**

Of the contraindications, allergic reactions, age under 18 years old, severe forms of liver and kidney failure, breastfeeding should be noted. Prescribing the drug to pregnant women should be careful so that the risks to the fetus are minimal.

Patients can order and pay for the drug in a convenient online format, as well as order a service for its fast delivery.

### **X-VIR: order**

Placing an order takes place by filling out an online application with all the contact details so that we can deliver the medicine to the correct address. After filling out the application, send it to us and expect feedback. Pharmacy managers will contact you to clarify everything regarding the order.

### **X-VIR drug delivery**

Delivery with us is fast and prompt: each patient receives the medicine on time, with the guarantee that all transportation conditions are met in full.

### **X-VIR: payment**

The customer makes the payment after receiving the order, making sure that the integrity of the packaging is not violated, and the expiration dates are normal. Both cash and non-cash payments are provided.
