Buy Cuchel (Trientine Hydrochloride 250 mg)

Cuchel, a medication to restore copper metabolism in the body, from the Indian manufacturer MSN Laboratories Private Limited, is available for purchase at the pharmacy. The drug is used to remove copper from the kidneys, liver, brain and other organs, it is prescribed for Wilson's disease and for hepatocerebral dystrophy. Before buying and using, be sure to consult your doctor.

The price of the drug Swing

The country of origin influences the cost of Cuchel medicinal product. India has less tax burden and less labor costs. In addition, the release of a drug based on a known active substance does not require research and advertising campaigns to promote the drug, since this has already been done by the manufacturer of the original drug. Generic is thus cheaper in terms of production and promotion. The pharmacy supplies Swing directly, without intermediaries, which makes the drug even more affordable.

Cuchel (Trientine hydrochloride 250 mg) reviews

German pharmacologists have synthesized a substance called trientine hydrochloride. On its basis, the drug Cyprin was created, the effectiveness of which in the regulation of copper metabolism in the human body has been clinically proven. The drug Kachel is created according to the same formula and is produced under the control of the copyright holder, which guarantees the reliability and quality of the drug. According to the reviews of patients taking Cuchel, it has a small number of "side effects" and can be used in severe forms of the disease.

Description of Cuchel

Cuchel medicine is supplied in a branded cardboard box, which contains a polymer jar with oval capsules. It contains 100 capsules, each containing 250 milligrams of trientine hydrochloride.

Indications and method of administration

Cuchel is used for Wilson-Konovalov disease. The medicine is used when patients have an allergic reaction to penicillamine. It is recommended to take a swing, one capsule once a day, with a pause of 60 minutes between taking other medications.
