Entavir 1 mg - where to buy?

Country of origin of the drug Entavira 1 mg - India. It was created on the most advanced equipment of the famous Cipla company. The development is based on the active substance - Entecavir, which has been recognized as one of the leaders in the fight against the chronic hepatitis B virus. On the website of our Pharmacy, you can buy Entavir 1 mg at a very competitive price. But in no case should you self-medicate. It is imperative to go for a consultation with a doctor working in the relevant field, who will prescribe the treatment you need.

Prices for ENTAVIR 1 mg

Unlike the very expensive original Baraklud, the generic ENTAVIR 1 mg is sold at affordable prices for a person of any class. The drug contains the same active substance as the original - Entecavir. And in its effectiveness it is in no way inferior to him. It is a pleasant fact that ENTAVIR 1 mg is much cheaper than Baraklud, although therapy with both drugs is about the same. It is available to order on the website of our online pharmacy today.

Original drug Baraklud 1 mg

The original drug Barakluda has the same active substance as in its Indian generics - Entecavir, which has proven its effectiveness, not just once, in medical practice. Baraklud is prescribed for use for a very long period of therapy. Contraindicated in children under 18 years of age, women who are breastfeeding and pregnant women. The drug restores the natural functioning of the liver and relieves patients from pain.

Description Entavir 1 mg

ENTAVIR 1 mg is produced in hard film-coated tablets. The package contains 10 pieces of tablets. Each of them contains 1 mg of the active substance entecavir.

Indications

Doctors prescribe Entavir 1 mg for long-term treatment that can last from a year or more. The drug is intended for a course aimed at combating the chronic hepatitis B virus.

Contraindications

It is categorically contraindicated in children who have not reached the age of 18. It is not used during the treatment of pregnant women and during lactation. It is also not allowed for patients who have individual sensitivity to the active substance.
