Description of the drug Entecavir X-VIR

The Indian antiviral drug Entecavir X-VIR is produced in only one Natco Pharm plant. The specialists of this enterprise strictly monitor the quality of products, all their preparations are certified, tested and found to be effective in the treatment of diseases. This drug belongs to a class of drugs for combating various forms of Hepatitis B. Thanks to a large study of this drug, its creators have been able to achieve maximum efficiency in the treatment of all forms and stages of Hepatitis.

The main form of release of the drug is tablets in a special protective film shell. One package of the drug contains 30 tablets. In addition to the active substance of the drug - entecavir, it also contains various additives. To observe the correct intake, pay attention to the shelf life of the drug, it is two years, the drug should be stored at temperatures up to +25 degrees. The drug is taken on an empty stomach, two hours before a meal, or two hours after a meal. Entecavir X-VIR is intended for people over 18 years of age. Before use, be sure to consult with a specialist.

Due to its carefully selected composition, Entecavir X-VIR is very well absorbed through the walls of the gastrointestinal tract into the blood. The drug is excreted through the genitourinary tract. With the help of the drug, the Hepatitis B virus is actively suppressed.

Be careful when taking Entecavir X-VIR, as the drug Entecavir X-VIR can cause side effects, which include: headache, migraine, fatigue, and in some cases, hair loss. The maximum dosage of the drug should not exceed 1 mg per day, however, with an additional doctor's prescription, it can be increased.

Antiviral drug Entecavir X-VIR is a cheap analogue of drugs designed to fight the hepatitis virus, but it is not inferior in its effectiveness. The full course of treatment of the drug is one year, during which time it is necessary to take 13 packs of the drug.
