Buy Lopikast (Lopinavir 200 mg, Ritonavir 50 mg)

Lopicast, a drug for the treatment of HIV and recommended for the treatment of coronavirus, is manufactured by the Indian company Aprazer at the production facilities of India's largest drug manufacturer, Natco Pharma Ltd. You can buy Lopikast with fast delivery at the pharmacy.

Price for Lopicast (lopinavir 200 mg, ritonavir 50 mg)

The drug Lopikast is licensed from the manufacturer of the original drug - Kaletra, which was developed by American and German pharmacologists to fight the human immunodeficiency virus. WHO has transferred the recipe and the license to manufacture this drug to reliable pharmaceutical companies in India, including Aprazer. Low labor costs, reduced tax burden and some other factors allow Lopikast to be offered to consumers several times cheaper than the original. The threat of the spread of coronavirus makes the drug in demand and necessary, but this does not affect the cost of the pharmacy, the drug is available for order at the specified price.

Reviews on Lopikast

Studies have shown that the active agent lopinavir in Lopicast acts on a protein in the DNA of infected cells, destroying the transport and replication system of the virus. This helps to stop the spread of the disease. The ritonavir contained in the drug helps to achieve the maximum concentration of liponavir in the body, which enhances the effectiveness of the tablets. Reviews of Lopikast tablets from those who have already taken the medicine indicate a rapid decrease in viral load in HIV infection and the beneficial effects of the drug on the body as a whole with hepatitis B. According to virologists, treatment of coronavirus with Lopikast should completely eliminate the disease.

Description of tablets Lopicast

Each Lopicast tablet contains 200 mg of lopinavir and 50 mg of ritonavir. The package contains 120 tablets, which are packed in a plastic tube with a lid. The expiration date, composition and manufacturer's brand marks are indicated on the cardboard box with the medicine.

Reception methods

As a therapy against HIV, Lopikast is taken once a day, two tablets at a time. The dosage can be changed according to the recommendations of the attending physician. For the treatment and prevention of coronavirus, you should consult a doctor for the dosage and method of administration!

Contraindications

The drug is not recommended for people under 3 years old or weighing less than 40 kilograms, as well as for individual intolerance to the components of the drug.
