Description

Basic informationDescriptionOrder, delivery and payment

Manufactured by the Indian pharmaceutical company Hetero, Naivex is a generic brand of the original drug Tivikay. It is used for monotherapy of HIV infection, as well as as part of its combination therapy. The active ingredient of the drug is dolutegravir, the international trade name and spelling is Naivex.

Buy drug Naivex

Patients can make a purchase of the drug "Naivex" through an online application in the appropriate section of ours.

Naivex: price

Since Naivex is an Indian generic drug, the manufacturing and delivery costs are much lower than those of the original drug. It is for this reason that the cost of "Naivex" is affordable for patients, and they can always receive timely and effective treatment.

Naivex Reviews

Infectious disease doctors and their patients speak well of this drug, noting its high antiviral activity. Already two or three weeks after the start of an intensive course of treatment, patients feel much better, and in the future, even more significant positive dynamics are observed.

Film-coated tablets at a dosage of 50 mg, 30 pieces in each package. Reception - one tablet daily, swallowing whole, on an empty stomach or after meals.

Description of the drug Naivex

Due to the directed action of the leading component of the drug, dolutegravir, the viral load on the body decreases with a significant improvement in the patients' well-being. The drug received official approval from the FDA (the international organization that carries out the management of sanitary supervision, including for medicines).

Naivex: indications for use

Mono-and combination therapy for HIV-infected.

Naivex: contraindications

Individual intolerance to the drug in the form of allergic reactions, pregnancy and breastfeeding. You can not prescribe medicine to people with severe kidney and liver failure. Other chronic diseases with a protracted course are also contraindications.
